## FOREWORD

A "weasel word" is defined as "a colloquial term for a word used to avoid being forthright"

"Modest" seems to be the most recent manifestation of this use. "Modest" used as an adjective is defined as limited or small.

Our politicians are currently using this word seemingly to obscure the fact that various legislative changes they are proposing to make are in fact not at all limited or small, when closely examined.

If we are being told that a change is "modest", particularly by a politician, we would do well to examine it carefully!

ChatGPT and equivalent software has been much in the news lately as it appears to have come into general use by many individuals and corporations.

Anything I've read generated by this AI software reads like a corporate mission statement or a politician's electoral statement; full of high-sounding phrases and good intentions but lacking specificity.

I do propose to try it, though I haven't yet done so and be assured I've not used it to write this short foreword.

When requested to assemble a conversational or creative response to a query, it scans terabytes of data out in cyberspace to create a response. Microsoft has a disclaimer that sometimes the responses may be incomplete or inaccurate, so be careful if you're sending it on.

One critic has commented that eventually, as more ChatGPT responses are out there, the program will eventually be using its own creations to provide a response, thus feeding on itself in a never-ending circle.

Happy days!

Enjoy your perusal of the catalogue.
